BUG-003 : Wishlisted products not displayed on Wishlist page despite being added successfully

Bug Details

- **Bug ID:** BUG-003
- **Module:** Wishlist / Favorites
- **Project:** AJIO Web – E-commerce Purchase Flow

Description

When a logged-in user adds a product to the wishlist from the Product Detail Page (PDP), the product is correctly marked as wishlisted, and the wishlist state persists across navigation and re-login. However, when navigating to the Wishlist page via the heart icon, the page displays an empty state message instead of the wishlisted product.

Environment

- Application: AJIO Web (https://www.ajio.com/)
- Browser: Chrome v121
- OS: Windows 10
- User Type: Logged-in user

Preconditions

- User is logged in
- Product is available in stock
- Wishlist is initially empty

Steps to Reproduce

1. Search for any product and open its Product Detail Page (PDP)
2. Click on **Save to Wishlist** and observe the confirmation message
3. Verify that the wishlist button changes to **Remove from Wishlist**
4. Click on the **Wishlist (heart) icon** in the header
5. Observe the Wishlist page content

Expected Result

- The product added to the wishlist should be displayed on the Wishlist page
- Wishlist page should reflect the same wishlist state shown on PDP

Actual Result

- Wishlist page displays the message **"Your Wishlist is empty!!"**
- Wishlisted product is not displayed, even though PDP shows **Remove from Wishlist**

Severity

High

Priority

High

Impact

- User loses trust in the Wishlist feature
- Saved products appear lost
- Core e-commerce functionality is broken
- Blocks further actions such as removing items or adding products to the cart from the Wishlist
